

Dear Members,

I am sending you this note to inform you that there is a temporary closure of the Zebra Agate Site. ADOT is working on US260 near the site and due to the lane closure there is currently no access to FS1316. I spoke with ADOT and they informed me that the lane closure would be lifted within a month (no later than Nov 1) as the weather will become too cold to continue work.

I also spoke with Tonto National Forest personnel who indicated that there were no planned closures of FS1316.

Happy Rock Hunting

Rock Dog
