

Members,

I made a visit to Sycamore Canyon on 12-12-14 and discovered a second collecting location. I have indicated the second area's GPS coordinates and updated: the directions, the material album, the Topo maps and GPS Waypoints.

Collecting site 2 is about a mile down the road just past a large bump caused by a small stream crossing the road. Just past this there is a left turn into a camping area that can accommodate up to 5-6 vehicles.

Happy Rock Hunting,

Rock Dog
