

Dear Members,

Here is the announcement as intended (with carriage returns not stripped out)

Because of increasing concerns regarding internet security the website has been upgraded to reside on a more secure server. You now will see that the website address starts with https: instead of beginning with http:. This means that the site is now located on a secure server with SSL.

SSL (Secure Sockets Layer) is the standard security technology for establishing an encrypted link between a web server and a browser. This link ensures that all data passed between the web server and browsers remain private and integral.

You do not need to do anything extra to access the secure site. Requests for the old http: will automatically be redirected to the https: server.

Happy Rock Hunting
