

Dear Members,

One of our fellow rockhounds has reported the following:

1. Payson Purple Agate: A gate has been erected preventing access to this collecting area.  
(This site will be placed on the closed list. Photo of gate attached.)

2. Payson Agate Mountain: The section of road past the 3<sup>rd</sup> gate has been washed out by recent storms.

(I will place a warning on the page for this site. Please let me know if you have any updated info about this trail)

3. Diamond Point Crystals: Digging is only allowed October 1 to February 28. Seems many are ignoring the posted signs, which could cause the Forest Service to close the area.  
(Dig only when allowed and be sure to fill your holes)

If you have updates to any sites, your comments are always welcome.

Happy Rock Hunting
