

**August 09, 2019**

**Hello Members,**

**I have just learned from a fellow rockhound that the JC Holmes mine is located on Arizona State Trust Land. This means mineral collecting is not allowed. This site has been moved to the closed to collecting list. (There are now six closed sites).**

**The primary mineral found at the JC Holmes was Vanadinite. This mineral can be found at the Grey Horse Mine, Oklahoma Mine, and at the Table Mesa Site.**
